

Our mission

Your health is precious. That is why at medloop we want to put you at the centre of your care. We want every patient to be able to access and understand their personal health information. Your GP has partnered with us to make it easier for you to get that information and access the services you need from your GP practice. Whether you wish to book an appointment, request a repeat prescription or view your health record, our free app offers these services via your smartphone.

Need Help?

-  Or send us an email on — info@medloop.co

Get started

1. Download

You can download the Medloop app for free from the Apple App Store or the Google Play Store.

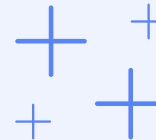

2. Registration

You will need a code from your GP practice to complete the registration process. Just ask for the 'linkage key' from reception once you have confirmed your ID.

3. Your account

Log in with your name, email address and choose a secure password.

4. SMS-Confirmation

We will send a one time, secure code via text message to the phone number that you entered. You will need to input this code into the app to link your mobile device with your account.

Your new GP practice app

The health companion for your pocket

*Have any questions or need help with the Medloop app?

Making access to healthcare simple

Book appointments

Our app makes it simple and straightforward to book an appointment. Just choose the best time for you and give a brief summary of your health needs. You will be reminded of upcoming appointments via a notification on your phone.

Repeat prescriptions

The app makes it quick and easy to order your repeat prescription. Simply go to the 'prescriptions' menu and select the medication you wish to order. This can be sent electronically to your selected pharmacy.

Your health record

Tests results

We've cut out the queues when you want to find out your test results - and we deliver them in plain english! The Medloop app allows you to view your results on your phone and helps you understand what they mean.

Proactive Care

Having an overview of your personal records will help you to better understand your own health and know when you need to book a follow up appointment. You can do this from your smartphone via the Medloop app.
